

How to Turn Off Split Payments

Last Modified on 07/07/2025 1:50 pm BST

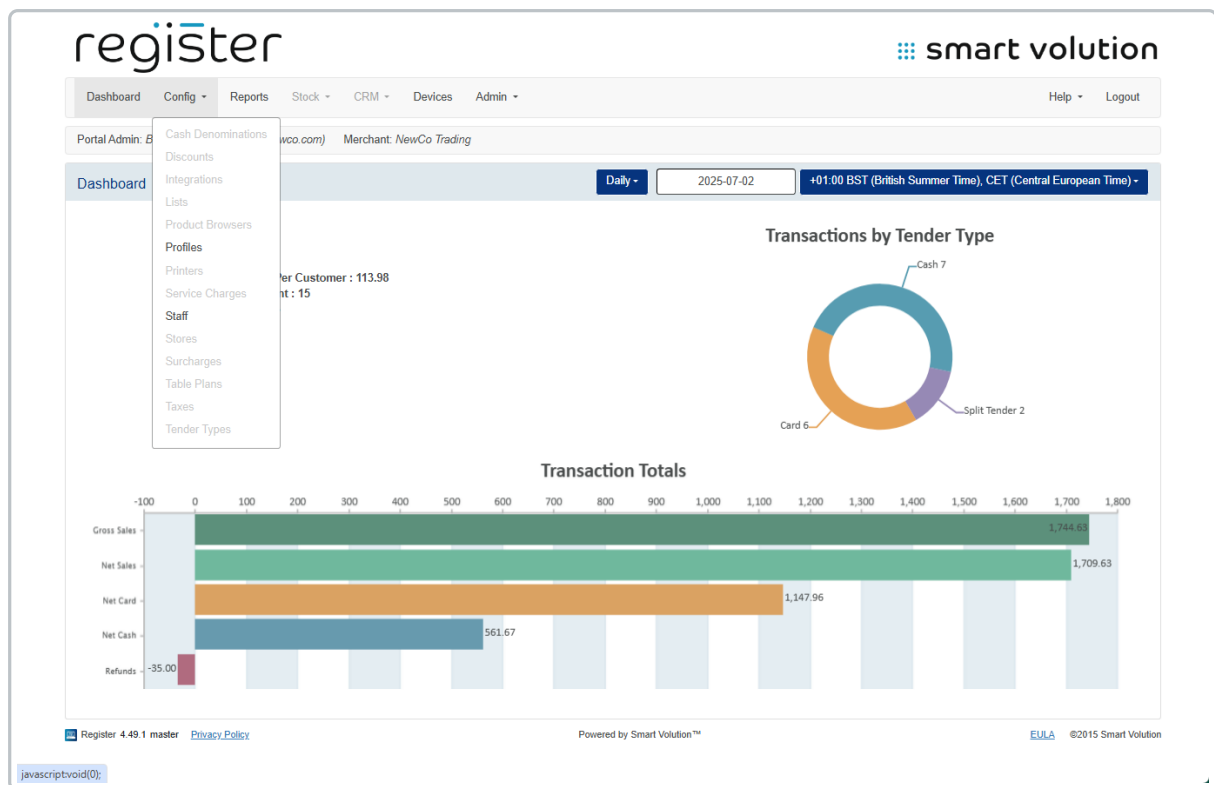

By default, your system allows **split payments**—useful when a customer wants to pay with multiple methods (e.g., part cash, part card) or when a group splits the bill. However, you can **disable** this feature easily if it's not needed.

Steps to Disable Split Payments via Web Portal:

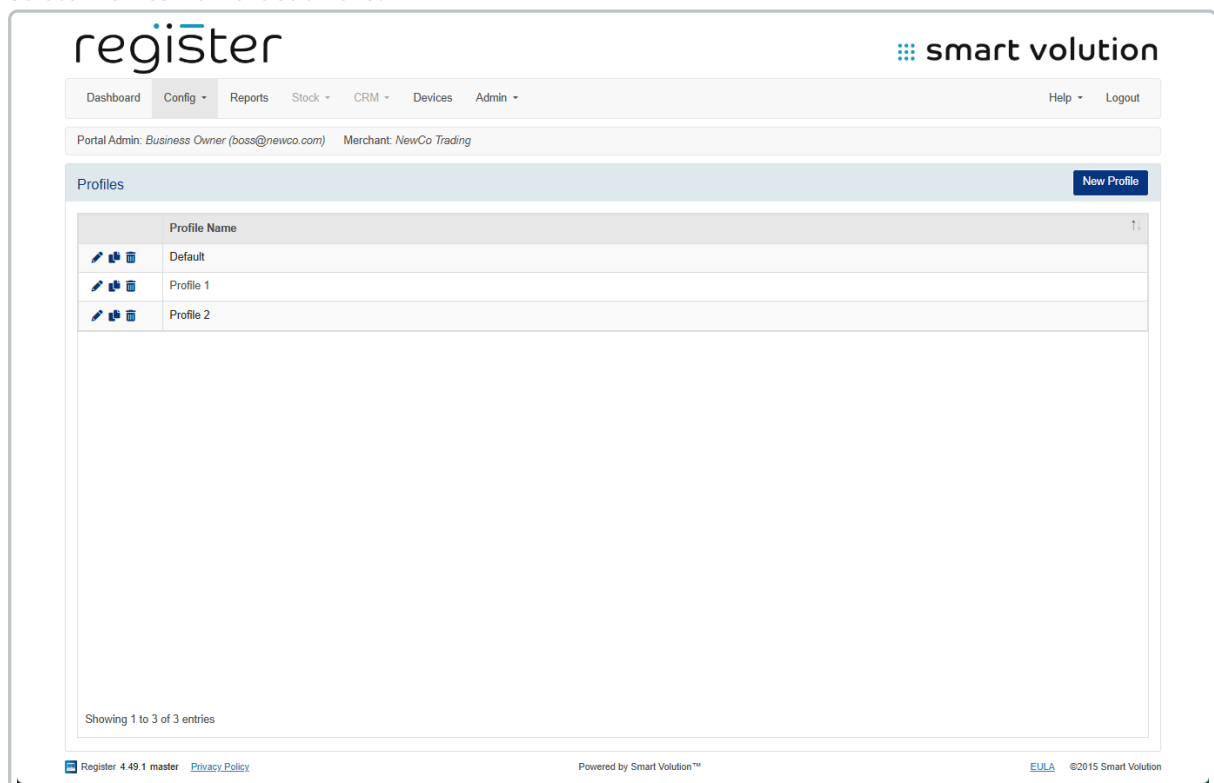

1. **Log in** to the **Web Portal** using the credentials provided by your **Solution Provider**.

A screenshot of a web portal login interface. At the top center is a light blue box titled "Login". Inside this box, there are two input fields: "Username" and "Password", both labeled "Required". To the right of the "Password" field is a blue "Submit" button. Below the login box, a small line of text reads "The Web Portal is best viewed using the Google Chrome™ browser." At the bottom of the page, there are three small text elements: "Register 4.49.1 master" on the left, "Powered by Smart Volution™" in the center, and "©2015 Smart Volution" on the right.

2. Click **Config** on the top navigation bar.

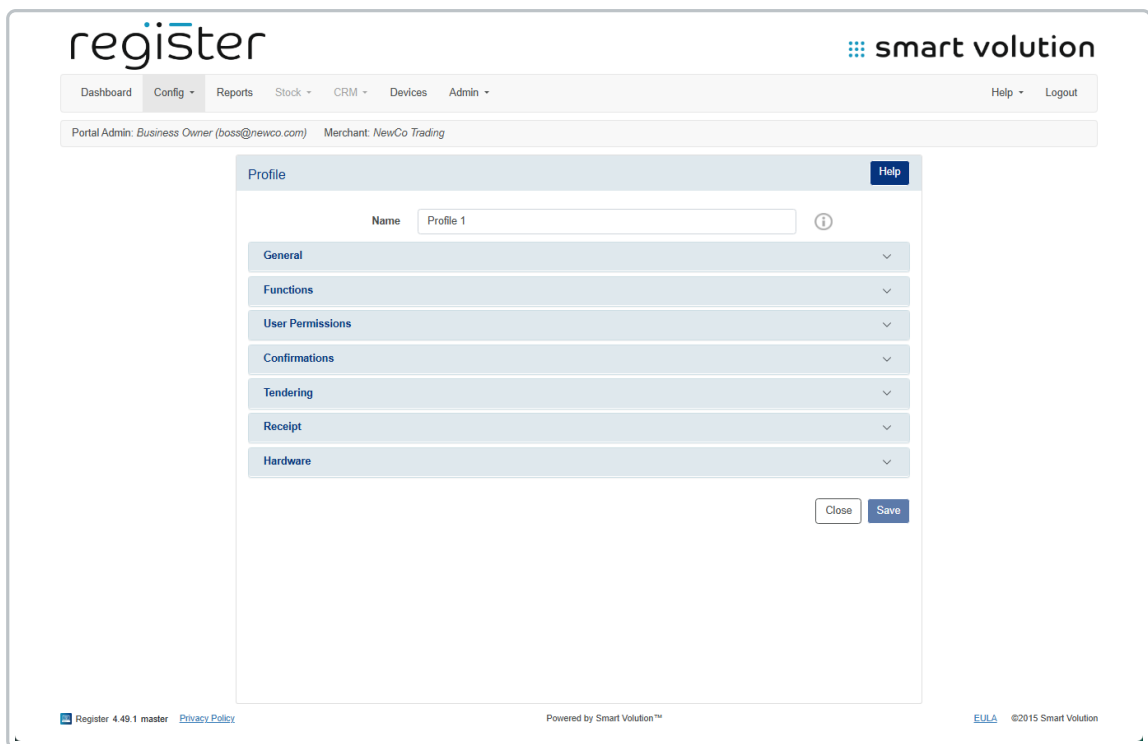

3. Select **Profiles** from the submenu.

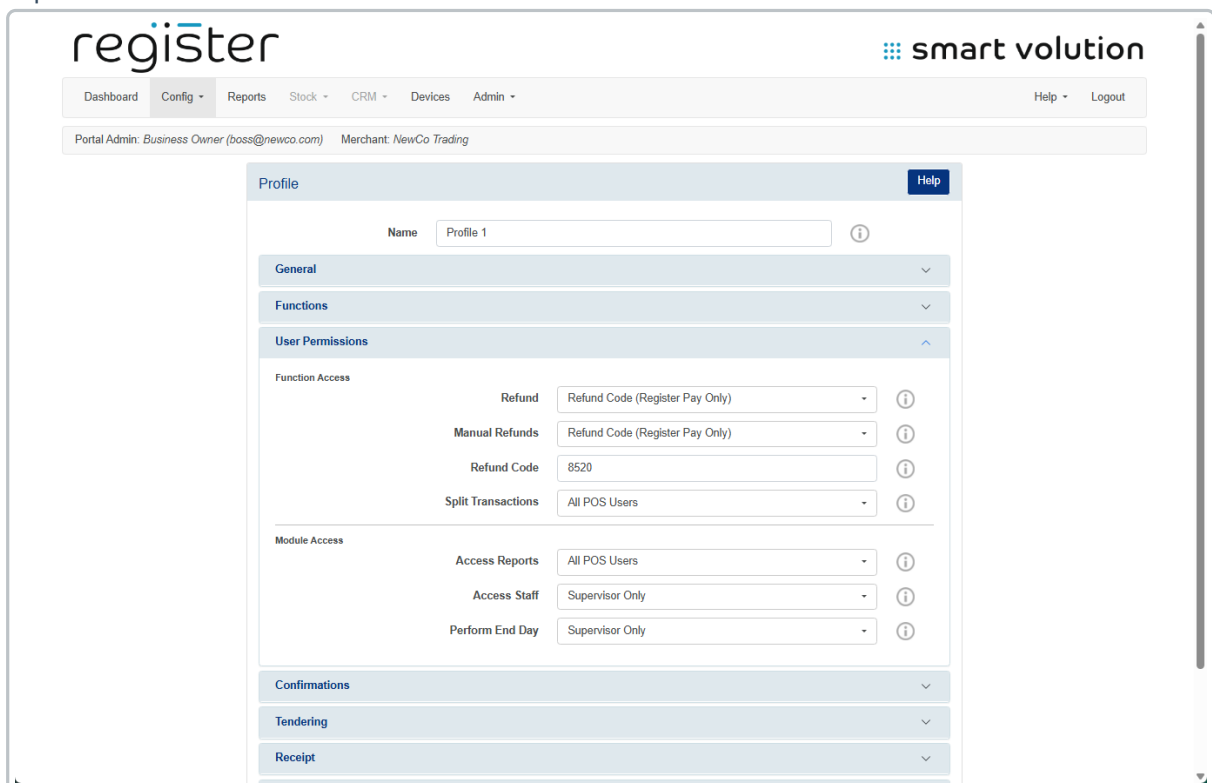

4. Identify the profile assigned to your device, then click the **Edit** () icon.

- You can confirm which profile your device uses in the **Devices** tab.

5. Expand the **User Permission** section.

6. Set the **Split Transactions** option to **Disabled**.

7. Click **Save** at the bottom of the screen.

? Apply Changes to Your Device:

8. On your device's **login screen**, tap the **Update Data** button (top right corner) to pull down the updated settings.
