Which Accounting Integrations Are Available?

Last Modified on 27/10/2026 3:49 pm GMT

Register Pay supports integration with a range of popular accounting packages, helping you automatically transfer your daily sales data into your accounting system.

The currently supported accounting integrations are:

- **Xero**
- **QuickBooks**
- **Sage**
- **FreshBooks**

Once configured, your daily sales totals are automatically submitted to your chosen accounting package.

For instructions on connecting your accounting package, see our Accounting Integrations article.

We recommend consulting your accountant or bookkeeper before setting up an integration to ensure the configuration is right for your business.
