Dark Mode

Last Modified on 28/10/2026 11:53 am GMT

Want a darker look for your system? **Dark Mode** switches the interface to a darker colour scheme, making it a great choice for low-light trading environments.

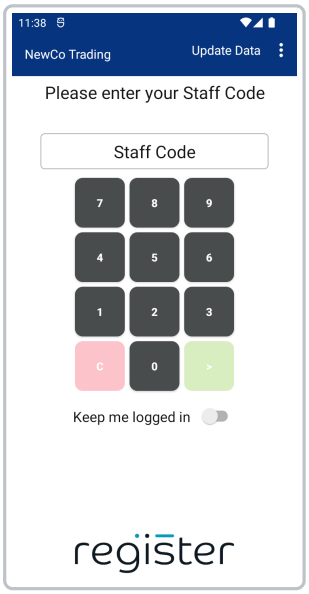

Whether you're running a busy restaurant, a cosy bar or a late-night venue, Dark Mode lets you choose the appearance that best suits your business.

Benefits of Dark Mode

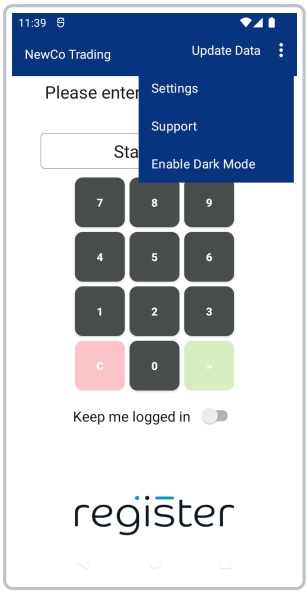

- **Comfortable viewing** – a darker interface that may be more comfortable to use in low-light environments.
- **Perfect for hospitality** – ideal for restaurants, bars and venues operating in darker surroundings.
- **Modern appearance** – gives your system a sleek, contemporary look.
- **Your choice** – switch between Light Mode and Dark Mode to suit your environment and preferences.
- **Consistent experience** – enjoy a coordinated look across supported Register and payment interfaces.

⚙ How to Enable Dark Mode

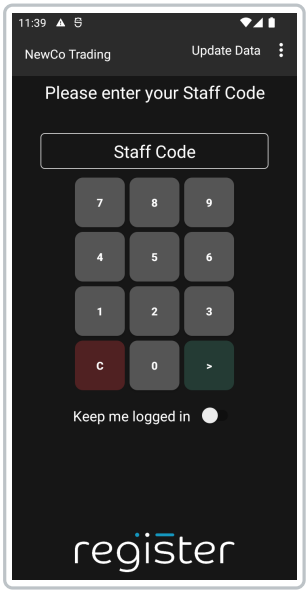

1. Go to the **login screen** on your device.

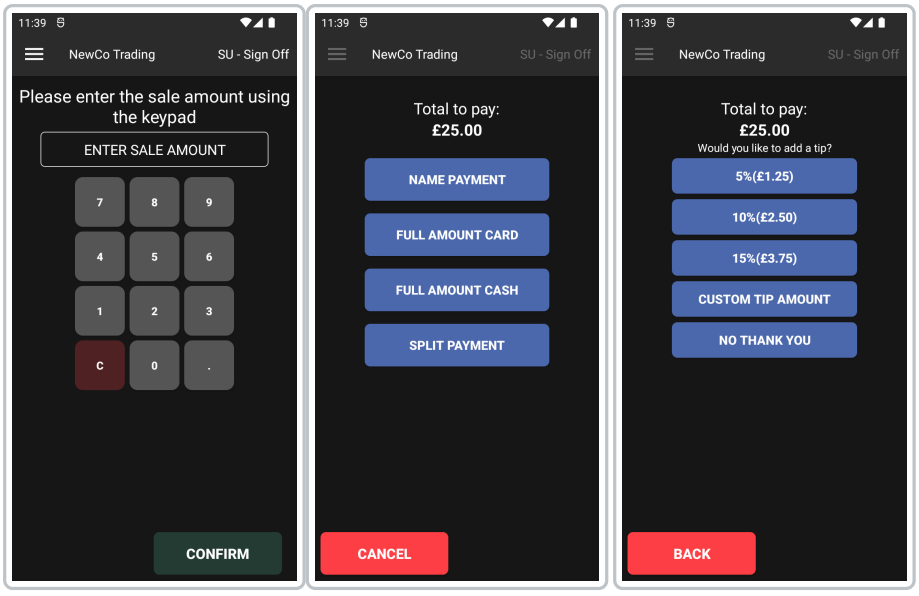

2. Tap the **three-dot menu (⋮)**.

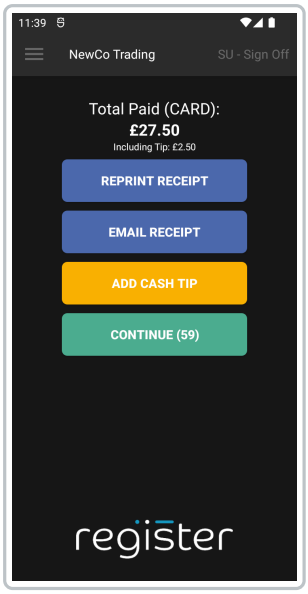

3. Select **Enable Dark Mode**.

4. Your interface will switch to the darker colour scheme.

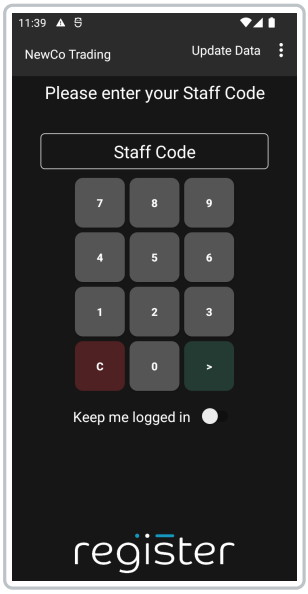

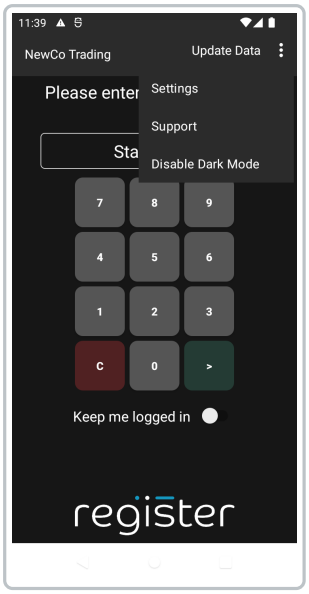

☀ How to Switch Back to Light Mode

To return to the standard appearance:

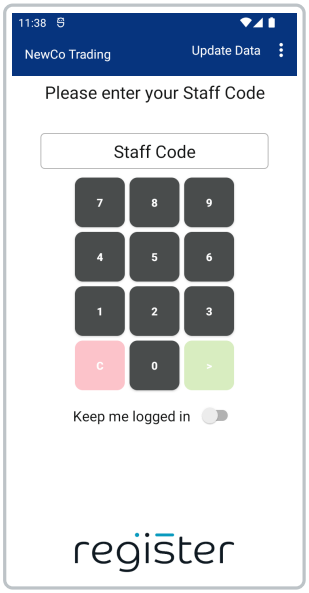

1. Go to the **login screen**.

2. Tap the **three-dot menu (⋮)**.

3. Select **Disable Dark Mode**.

Your interface will switch back to Light Mode.

Dark Mode. Designed for the way you trade. Choose the look that works best for your business and your trading environment.
